Haldwani (263139), Uttarakhand

anshulsm2802@gmail.com

+91 – 8439831358

Passionate Software Engineer with a knack for problem-solving, seeking opportunities to harness the power of code and contribute to the digital revolution.

Education

B.Tech, Computer Science & Engineering 2021-25
Graphic Era Hill University, Bhimtal

12th (Senior Secondary Examination) 2021
CBSE Board

10th (Secondary Examination) 2019
CBSE Board

Technical Skills

- Programming Languages – C, C++, Java
- Web Technologies – PHP, MySQL, HTML, CSS, JavaScript

Academic Projects

Stock Market Price Prediction App

Built an interactive web app using Streamlit to predict stock prices using machine learning. The app fetches real-time data, performs preprocessing, trains predictive models, and visualizes future stock trends—offering a hands-on example of practical AI in finance.

AI Image SaaS Platform

I created an AI-powered image processing platform using Next.js, TypeScript, and MongoDB. It features AI capabilities like image restoration, object and background removal, and generative fill. I implemented secure user authentication with Clerk and payment processing via Stripe, all optimized for scalability with a credit-based system and a responsive UI using TailwindCSS and Shadcn UI.

Experience

Software Development Intern – Saiket Systems

Mar-Apr'25

I completed a remote internship that focused on full-stack development and real-world software engineering challenges. During this experience, I collaborated on structured development tasks, improved my coding and debugging skills, and successfully delivered projects that aligned with the company's objectives. I also gained valuable exposure to professional workflows, deadlines, and best practices in software development.

Trainings & Certifications

- AWS Certified: Cloud Practitioner Mar'25
- AWS Cloud Practitioner Essentials (AWS training and Certification)
